# PLANT CLEMATIS THIS FALL

CLEMATIS PLANTED NOW will receive the benefit of the fall rains to establish a root system and will be ready for an early start in the spring. Clematis start in the spring with the first few warm days. Fall planting takes advantage of this early start to produce a larger top and more blooms the following summer.

Our strong two year old, own root plants are ready for immediate shipment. Each plant is carefully wrapped, staked and labeled and shipped fresh for your order.

Two precautions for fall planting; mulch the plant when winter arrives to prevent stem injury by action of the frost on the soil, and tie the top to a stake or support to prevent the winds from whipping it about. Danger from mice or rabbits may easily be prevented by putting wire around the stems before mulching. Full planting instructions accompany each order.

PLACE YOUR ORDER NOW for some of these beautiful ornamental vines and enjoy a fine display of color in your garden next summer.

ORDER BLANK ENCLOSED FOR YOUR CONVENIENCE
